SOFTWARE ENGINEER II   2016 – Present
Garmin International, Inc

- Collaborated with a team of developers to build the front end for Garmin's first globally unified support experience which included robust search features and live chat while achieving a wide range of browser compatibility and full ADA compliance

- Pioneered Garmin IT's first consumer facing Node application by leading work on a marine maps discovery tool that helped speed up and enhance the map shopping experience for customers

- Worked as the lone front end developer while embedded on a backend eCommerce team to build the UI and logic for an internal rules engine that allowed the business to create and manage promotions for the online store

- Served as scrum master while working on a team that met tight GDPR compliance deadlines by rolling out new privacy policy pages, a global forms tool to manage and create compliant forms, and a form administration tool that allowed the business to review submissions

- Lead work developing reusable UI components and defining strategy that enabled global marketing teams to build pages quickly and easily without writing code in an effort to unify the core of garmin.com and migrate off of deprecated infrastructure

UX DEVELOPER INTERN   2014-2015
Garmin International, Inc

- Collaborated with social media and design teams to create websites for advertising campaigns

- Worked closely with design and content teams to add features to web pages that highlighted new product launches

- Built the UI for an internal project management tool that extended Jira's functionality

- Fixed styling problems on over 30 web pages making them responsive and cross-browser compatible

- Added our team's portfolio of projects to Bitbucket and set up CI/CD pipelines for each project

FREELANCE DESIGNER/DEVELOPER   2010 – Present
